

# Sea Monsters Confirmed to Exist in Iceland

written by Entropy | October 6, 2014

The Truth Commission of Iceland has ruled that, Lagarfljótsormurinn, the sea monster that inhabits lake Lagarfljót near Egilsstaðir, is real based on this video.

Last year, Youtube user haycall captured this video of the Echo Park Lake Monster.

Inspired by Iceland, Entropy formed a new Truth Commission and have deemed after a long two-year investigation that the Lake Monster in Echo Park Lake is real too.
